PBS DOCUMENTARY

Arizona Metals CEO Marc Pais was on site to film a new PBS documentary ViewPoint with Dennis Quaid. This documentary will focus on exploration on the Kay Mine Project and will air to 65 million PBS subscribers as well as on FoxNews, the Discovery Channel and the History Channel. We will be sure to share this documentary with our subscribers when it becomes available.

VIEWPOINT

DRILLING RESULTS

On March 6th Arizona Metals announced new drill holes from the Kay Mine Deposit. Pictured above is drill core from Hole KM-23-133, showing the 0.5 m interval 407.5 m to 408 m which intersected 28.7 g/t gold, 7.1% copper, 0.99% zinc, and 564 g/t silver (for an equivalent grade after assumed recoveries of 36.8 g/t AuEq).

Marc Pais, CEO, commented, *“These new drill results from the Kay Deposit continue to point to its expansion potential, in this case extending shallow gold-rich mineralization 32 m south of previous drilling.*

We will continue to test these shallower portions of the deposit along more than 350 m of strike length defined to date, while also expanding mineralization with the

second rig targeting northern and southern extensions of the Kay Deposit as part of our resource definition program.”
